\* Lending data are not shown separately for the 69 towns that consist of only part of a census tract (in one case, a town -- Winchendon -- contains one complete tract, but shares a second tract with another town). Census tracts are the smallest unit for which lending data are reported under the Home Mortgage Disclosure Act (HMDA). In these cases, the towns have been placed into 23 groups that fall within census tract boundaries; most of these groups consist of two towns, but in two instances six towns share a single census tract. These groups are shown at the end of each county's alphabetical listing of towns. In some cases, space limitations required cryptic abbreviations.

\* Lending data are not shown separately for the 69 towns that consist of only part of a census tract (in one case, a town -- Winchendon -- contains one complete tract, but shares a second tract with another town). Census tracts are the smallest unit for which lending data are reported under the Home Mortgage Disclosure Act (HMDA). In these cases, the towns have been placed into 23 groups that fall within census tract boundaries; most of these groups consist of two towns, but in two instances six towns share a single census tract. These groups are shown at the end of each county's alphabetical listing of towns. In some cases, space limitations required cryptic abbreviations.

# When no loans were made to black and/or Latino borrowers in a town, the corresponding cells for "% High-APR" and "High-APR Share Disparity Ratio" are marked "na," for "not applicable." The cell for "High-APR Disparity Ratio" is also marked "na" when the "% High-APR" for white borrowers in a town is 0.00%.

\* Lending data are not shown separately for the 69 towns that consist of only part of a census tract (in one case, a town -- Winchendon -- contains one complete tract, but shares a second tract with another town). Census tracts are the smallest unit for which lending data are reported under the Home Mortgage Disclosure Act (HMDA). In these cases, the towns have been placed into 23 groups that fall within census tract boundaries; most of these groups consist of two towns, but in two instances six towns share a single census tract. These groups are shown at the end of each county's alphabetical listing of towns. In some cases, space limitations required cryptic abbreviations.

Note: See preceding table for the numbers of loans to black, Latino, & white borrowers that were used to calculate this table's percentages.

\* Lending data are not shown separately for the 69 towns that consist of only part of a census tract (in one case, a town -- Winchendon -- contains one complete tract, but shares a second tract with another town). Census tracts are the smallest unit for which lending data are reported under the Home Mortgage Disclosure Act (HMDA). In these cases, the towns have been placed into 23 groups that fall within census tract boundaries; most of these groups consist of two towns, but in two instances six towns share a single census tract. These groups are shown at the end of each county's alphabetical listing of towns. In some cases, space limitations required cryptic abbreviations.

# When no loans were made to black and/or Latino borrowers in a town, the corresponding cells for "% High-APR" and "High-APR Share Disparity Ratio" are marked "na," for "not applicable." The cell for "High-APR Disparity Ratio" is also marked "na" when the "% High-APR" for white borrowers in a town is 0.00%.

\* Lending data are not shown separately for the 69 towns that consist of only part of a census tract (in one case, a town -- Winchendon -- contains one complete tract, but shares a second tract with another town). Census tracts are the smallest unit for which lending data are reported under the Home Mortgage Disclosure Act (HMDA). In these cases, the towns have been placed into 23 groups that fall within census tract boundaries; most of these groups consist of two towns, but in two instances six towns share a single census tract. These groups are shown at the end of each county's alphabetical listing of towns. In some cases, space limitations required cryptic abbreviations.

Note: See Supplemental Table 8 for the numbers of loans to blacks, Latino, and white borrowers in each community that were used to calculate this table's percentages.

\* Lending data are not shown separately for the 69 towns that consist of only part of a census tract (in one case, a town -- Winchendon -- contains one complete tract, but shares a second tract with another town). Census tracts are the smallest unit for which lending data are reported under the Home Mortgage Disclosure Act (HMDA). In these cases, the towns have been placed into 23 groups that fall within census tract boundaries; most of these groups consist of two towns, but in two instances six towns share a single census tract. These groups are shown at the end of each county's alphabetical listing of towns. In some cases, space limitations required cryptic abbreviations.

# Blank cells indicate that no applications from Asian, black, and/or Latino borrowers were reported for that town. In these cases, the corresponding cells for the denial rate and the denial rate ratio are also blank.

\* Lending data are not shown separately for the 69 towns that consist of only part of a census tract (in one case, a town -- Winchendon -- contains one complete tract, but shares a second tract with another town). Census tracts are the smallest unit for which lending data is reported under the Home Mortgage Disclosure Act (HMDA). In these cases, the towns have been placed into 23 groups that fall within tract boundaries; most of these groups consist of two towns, but in two instances six towns share a single census tract. These groups are shown at the end of each county's alphabetical listing of towns. In some cases, space limitations required cryptic abbreviations.

Note: In this report, "Greater Boston" consists of the 101 cities and towns that constitute the Metropolitan Area Planning Council (MAPC) region.

\* Income categories are defined in relationship to the Median Family Income (MFI) of the metropolitan area in which the home is located. For the Boston Metropolitan Statistical Area (MSA), which includes all of Greater Boston, the MFI in 2009 was \$88,100. There are five other MSAs in the state, with MFIs in 2009 ranging from \$66,900 to \$79,700. Borrowers in Dukes and Nantucket Counties, which are not in any metro area, were classified using the MFI for the nonmetro part of the state (\$77,600). "Low" is less than 50% of the MFI in the relevant MSA; "Moderate" is 50%–80% of this amount; "Middle" is 80%–120% of this amount; "High" is 120%–200% of this amount; and "Highest" over 200% of the MFI in the relevant metro area.

\* Income categories are defined in relationship to the Median Family Income of the Boston MSA (\$88,100 in 2009). "Low" is less than 50% of this amount (\$1K-\$44K in 2009); "Moderate" is 50%-80% of this amount (\$45K-\$70K); "Middle" is 80%-120% of this amount (\$71K-\$105K); "High" is 120%-200% of this amount (\$106K-\$176K); and "Highest" is over 200% of this amount (\$177K or more). HMDA data report income to the nearest thousand dollars.

Note: In this report, "Greater Boston" consists of the 101 cities and towns that constitute the Metropolitan Area Planning Council (MAPC) region.

\* Income categories are defined in relationship to the Median Family Income (MFI) of the metropolitan area in which the home is located. All but 3 of the 101 communities in the MAPC Region are in the Boston MSA where the MFI in 2009 was \$88,100 (three small communities were in the Worcester MSA, where the MFI in 2009 was \$79,700). "Low" is less than 50% of the MFI in the relevant MSA; "Moderate" is 50%–80% of this amount; "Middle" is 80%–120% of this amount; "High" is 120%–200% of this amount; and "Highest" is over 200% of the MFI in the relevant MSA.

\* Income categories are defined in relationship to the Median Family Income (MFI) of the metropolitan area (MSA) in which the home is located. Communities in Massachusetts are located in six different MSAs, with MFIs in 2009 ranging from \$66,900 to \$88,100. "Low" is less than 50% of the MFI in the relevant MSA; "Moderate" is 50%–80% of this amount; "Middle" is 80%–120% of this amount; "High" is 120%–200% of this amount; and "Highest" is over 200% of the MFI in the relevant MSA. The minimum income needed to qualify for the "Highest" income category ranged from \$134K in the Pittsfield MSA to \$177K in the Boston MSA.

# In this report, "Greater Boston" consists of the 101 cities and towns that constitute the Metropolitan Area Planning Council (MAPC) region.

\* "Mass. Banks and Credit Unions": all banks with Mass. offices, plus all affiliated mortgage companies; excludes fed-chartered CUs.

"Licensed Mortgage Lenders": those requiring a state license to make mortgage loans in Mass.; mostly independent mortgage companies.

"Other Lenders": those not in either of the two preceding categories; mainly out-of-state banks.

For Mass. banks & credit unions, local performance in meeting community credit needs is subject to evaluation by federal and/or state bank regulators under the state and/or federal Community Revestment Act (CRA). Licensed mortgage lenders became subject to similar state evaluation under a state law enacted in 2007, with the first evaluations taking place in 2009. Other lenders are, essentially, exempt from such oversight and evaluation.

\* Indicates that the loans shown are for two or more affiliated lenders in the same “lender family.”  
Table 30 provides information on the individual lenders within each “lender” family.”

# CRA: banks with Mass. branches, whose local lending is subject to evaluation under the Community Reinvestment Act. LML: licensed mortgage lenders, mostly mortgage companies, who became subject to CRA-type state regulation beginning in 2008. OSB: other lenders, mainly out-of-state banks, who can do mortgage lending in Mass. without a license and are exempt from state regulation. CRA^ or LML^ or OSB^ indicates that the family includes more than one type of lender, but that more than 90% of the lending family’s loans are accounted for by lenders of the type indicated. MIX: lender families that include two types of lenders (with each lender type accounting for at least 10% of the lender family’s total loans).
